

SUCCESS STORY

Life Church

CHALLENGE

Life Church produces their church bulletins in-house. They were using two different computers and printers to produce their color bulletins. They would first print the front page of the bulletin in color on an inkjet machine. They would then take those bulletins to a separate laser mfp and print the calendar and church events on the back side of the previously printed bulletin. The ink and toner to produce the bulletins were costing Life Church a lot of money. It was also time consuming having to use two different machines and workstations producing a two sided bulletin.

SOLUTION

Allfax provided Life Church with a Color MFP copier with a duplexing feature which allowed them to produce a full color, two sided bulletin in one pass. Allfax also set Life Church up on a maintenance contract that included service and toner, saving them a significant amount of money. Life Church was able to set the MFP up on their network allowing other users to utilize the printing and scanning features.

BENEFITS

- Increased productivity in creating bulletins
- Reduced overall cost to produce bulletins and other church
