Cyrex Laboratories Launches New Patient Site

JoinCyrex.com Enables Patients to Partner With Their Health Care Provider for Testing and to Develop Personalized Life-Long Health and Wellness Strategy

PHOENIX, AZ--(Marketwired - Apr 22, 2015) - [Cyrex Laboratories](#), a clinical laboratory specializing in functional immunology and autoimmunity, is pleased to announce its new patient site [joincyrex.com/patients](#). The new site will enable consumers to work with their healthcare provider to get tested and develop a life-long-wellness strategy. Patients are encouraged to visit the site to learn about Cyrex Arrays, which include several screens for predictive antibodies related to autoimmune reactivity, arrays that test gut and brain barrier permeability, as well as arrays that test for reactivity to environmental triggers.

The newly designed patient portion of [joincyrex.com/patients](#) provides patients not only with insight on each Cyrex Array, but also with tools to begin a conversation with their healthcare provider about what tests may be appropriate for them. Patients can access an easy-to-understand brochure that fully explains the processes. Additionally, instead of a patient having to remember and recite details about the Cyrex Arrays when visiting their healthcare provider, the patient site features a handout that can be presented to healthcare providers explaining Cyrex testing, the process to get tested and how their healthcare professional can sign up for a Cyrex account.

"The new Cyrex patient site empowers consumers with the information they need to be an active partner with their healthcare provider," said Dr. Aristo Vojdani, pioneer of ELISA testing and chief scientific advisor for Cyrex Laboratories.

Consumers, physicians and other licensed healthcare professionals interested in learning more about Cyrex should visit [joincyrex.com](#) for additional information. Patients can access the site by clicking on the "for patients" link on [joincyrex.com](#).

About Cyrex Laboratories

Cyrex is a clinical immunology laboratory specializing in functional immunology and autoimmunity. Cyrex offers multi-tissue antibody testing for the early detection and monitoring of today's complex autoimmune conditions. Cyrex develops innovative testing arrays through continuous collaboration with leading experts in medical research and clinical practice. Cyrex differs from other labs by offering four pillars of excellence, including antigen purity, optimized antigen concentration, antigen-specific validation and parallel testing technology. Cyrex is based in Phoenix, Arizona and is a CLIA licensed laboratory.
